Survey Definitions and Instructions

This survey collects data on research and development (R&D) activities at Federally Funded R&D Centers (FFRDCs). Please report R&D activities and expenditures for your organization’s 2021 fiscal year.

Fiscal Year (FY)

Please report data for your organization’s 2021 fiscal year.

Research and Development (R&D)

R&D activity is creative and systematic work undertaken in order to increase the stock of knowledge — including knowledge of humankind, culture, and society — and to devise new applications of available knowledge. R&D covers three activities defined below — basic research, applied research, and experimental development.

- **Basic research** is experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundations of phenomena and observable facts, without any particular application or use in view.
- **Applied research** is original investigation undertaken in order to acquire new knowledge. It is directed primarily towards a specific, practical aim or objective.
- **Experimental development** is systematic work, drawing on knowledge gained from research and practical experience and producing additional knowledge, which is directed to producing new products or processes or to improving existing products or processes.

R&D Expenditures

Please include all current operating expenditures for activities specifically organized to produce R&D outcomes. This includes basic research, applied research, and experimental development funded by external sponsors or separately budgeted and accounted for by your organization using internal funds.

R&D *includes*:

- Sponsored research (including federal and nonfederal sponsors)
- Indirect costs associated with R&D projects
- R&D equipment and software
- R&D subcontract expenditures
- Clinical trials
- Research training grants

R&D does *not* include:

- Outreach or training programs
- R&D conducted by staff at outside institutions that is not accounted for in your financial records
- Capital projects (i.e., construction or renovation of research facilities)
- Routine testing
- Non-R&D program implementation or management
- Policy development

Question 1. How much of your total expenditures for separately budgeted research and development (R&D) came from the following sources in FY 2021? (See definition of R&D on the previous page.)

Report the **original source** of funds, when possible. For example, if you received **federal** funds from another organization, report that amount under “U.S. federal government.”

Please do not report capital construction costs.

Source of funds	R&D expenditures (Dollars in thousands) (for example, report \$25,342 as \$25)
<p>a. U.S. federal government Any agency of the United States government. Include federal funds passed through from another organization.</p>	\$ <input style="width: 100px; height: 20px;" type="text"/>

If your institution reported \$0 in Question 2, row h, skip this question and go to Question 4.

Use rows a–j to list up to 10 agencies that funded the largest R&D expenditures. Use row k to report any remaining amount.

Report the agency that was the original source of funds, when possible.

A list of federal departments, agencies and subagencies is included as a link on the web survey question.
