**Figure LBR-21**

Women with a bachelor's degree or higher in S&E and S&E-related occupations: Selected years, 1993–2019

STEM = science, technology, engineering, and mathematics.

Note(s):
Data are not available for all S&E-related workers for 1993–99. National estimates were not available from the Scientists and Engineers Statistical Data System (SESTAT) in 2001. Middle-skill occupations are excluded because the data source does not allow for the separation of middle-skill occupations from non-STEM occupations.

Source(s):
National Center for Science and Engineering Statistics, SESTAT, 1993–2013, and National Survey of College Graduates (NSCG), 2015–19.
