

Figure PBS-C

Coronavirus collaboration network, by country: 2020

Note(s):

Network diagram shows the number of cowritten articles by all pairs of countries within the top 50 producers of coronavirus-related research based on whole counting for those pairs that cowrote 50 articles or more. Coronavirus article counts refer to publications from a selection of conference proceedings and peer-reviewed journals in S&E fields from Scopus. Articles are classified by their year of publication and are assigned to a country on the basis of the institutional address(es) of the author(s) listed in the article. Links are only shown in a single direction, dictated by alphabetical order. The size of the nodes is proportional to the total number of coronavirus-related articles written by each country. The width of the links between nodes is proportional to the quantity of articles both countries have cowritten. Positioning of nodes is defined using the ForceAtlas2 algorithm.
