

Figure KTI-8

Global share of value added for semiconductor manufacturing for selected economies: 2002–22

EU-27 = European Union; ROW = rest of world.

Note(s):

Value added is the value of goods and services (gross output) minus the cost of intermediate inputs (energy, materials, and purchased services). Semiconductor manufacturing refers to industry “Manufacture of electronic components and boards” (International Standard Industrial Classification, Revision 4, 261), which includes the manufacture of semiconductors and other components for electronic applications.
