

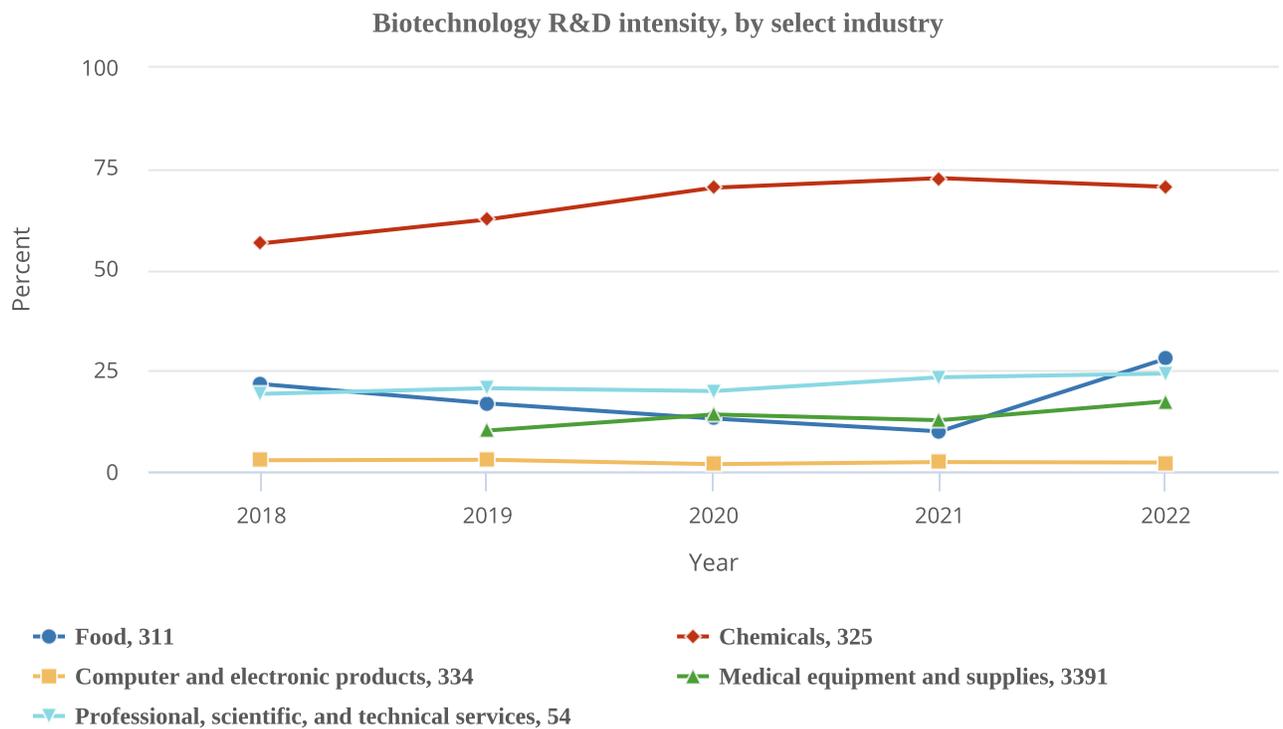

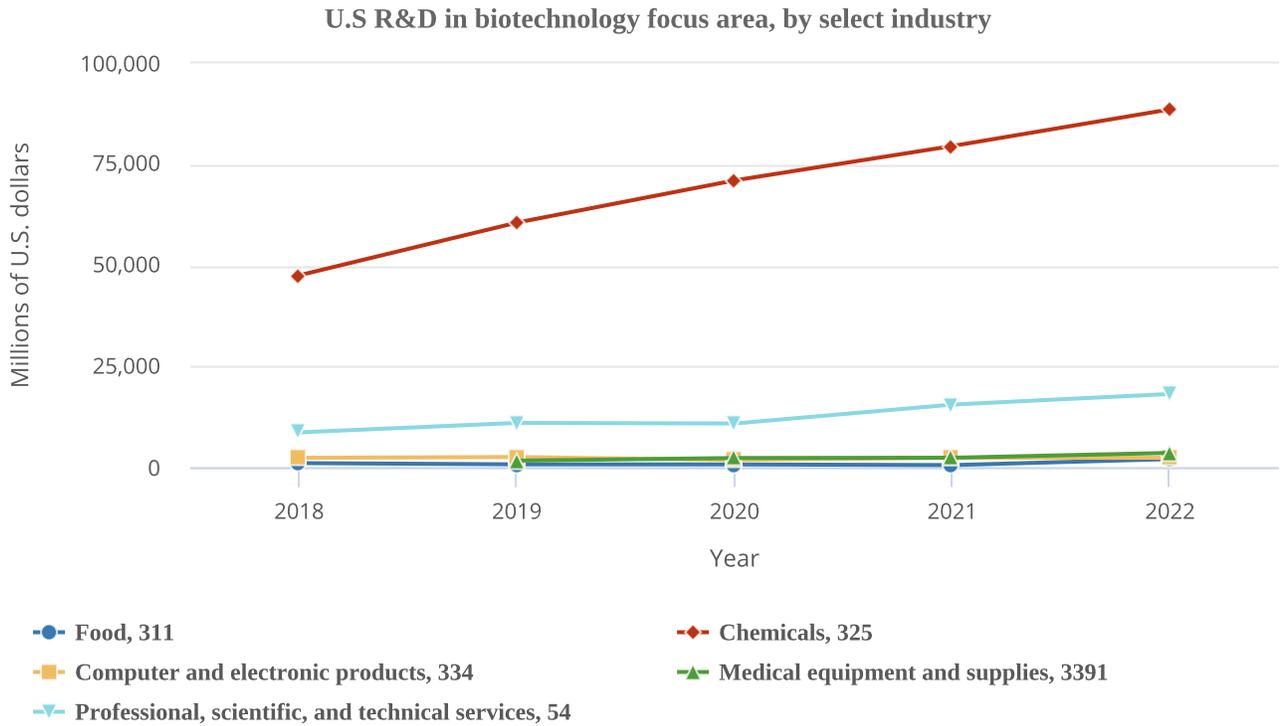

Figure DISC-A. Domestic business R&D paid for by the company and others and performed by the company in the biotechnology focus area, by selected industry: 2018–22

NA = not available.

NAICS = 2017 North American Industry Classification System.

**Note(s):**

Data for Medical equipment and supplies (NAICS 3391) are not available for 2018. Detail may not add to total because of rounding. Industry classification is based on the dominant business code for domestic R&D performance, where available. For companies that did not report business codes, the classification used for sampling was assigned. Statistics are representative of companies located in the United States that performed or funded \$50,000 or more of R&D and are not comparable with estimates published for years prior to 2018. Companies could report R&D in one, more than one, or no application area. Beginning in survey year 2018, these statistics include an adjustment to the weight to account for unit nonresponse; beginning in survey year 2019, these company count estimates reflect a change in rounding methodology. The Business Enterprise Research and Development (BERD) Survey does not include companies with fewer than 10 domestic employees.
