

Figure TAL-27. Share of doctoral degrees awarded in S&E fields, by state: 2023

Note(s):

Data correspond to research doctorates as collected in the Survey of Earned Doctorates (SED). The survey data collection for field of study changed in 2021, which may affect the data comparison across years. This figure uses the Classification of Instructional Programs–based field taxonomy, which is used for reporting single-year data from 2021 to the present; the data may not match the data based on the trend field taxonomy. For more information about the 2021 field taxonomy changes, see the "Technical Notes" in <https://nces.nsf.gov/surveys/earned-doctorates/2023>.
