

Figure TAL-29. S&E doctoral degrees awarded, by sex and field: 2023

**Note(s):**

Percentages are based on all respondents, including those who did not report sex. Percentages may not sum to 100% due to rounding. In 2023, 0.1% of geosciences, atmospheric, and ocean sciences degree recipients did not report sex. The survey data collection for field of study changed in 2021, which may affect the data comparison across years. This figure uses the Classification of Instructional Programs–based field taxonomy, which is used for reporting single-year data from 2021 to the present; the data may not match the data based on the trend field taxonomy. For more information about the 2021 field taxonomy changes, see the "Technical Notes" in <https://nces.nsf.gov/surveys/earned-doctorates/2023>.
