

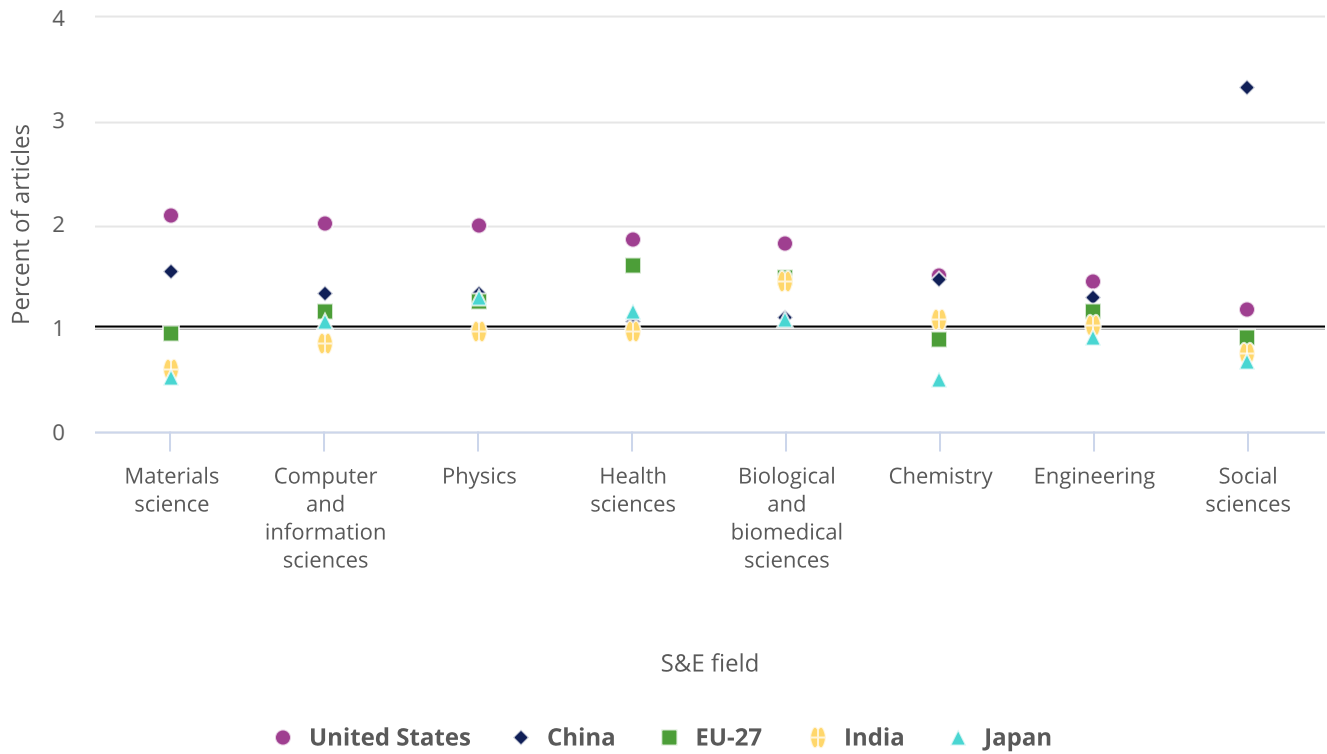

Figure 30. S&E publications in the top 1% most-cited journal articles as a share of all journal articles for selected S&E fields, by selected region, country, or economy: 2022

Note(s):

EU-27 is European Union. Articles are classified by their year of publication and are assigned to a region, country, or economy on a whole-count basis according to the institutional address(es) of the author(s) listed in the article. Citation data are based on all citations made to articles in their publication year and all following years and are normalized by subfield and publication year to allow for comparisons across subfields and over time, resulting in the world level standing at 1.00 for each subfield and year.
