

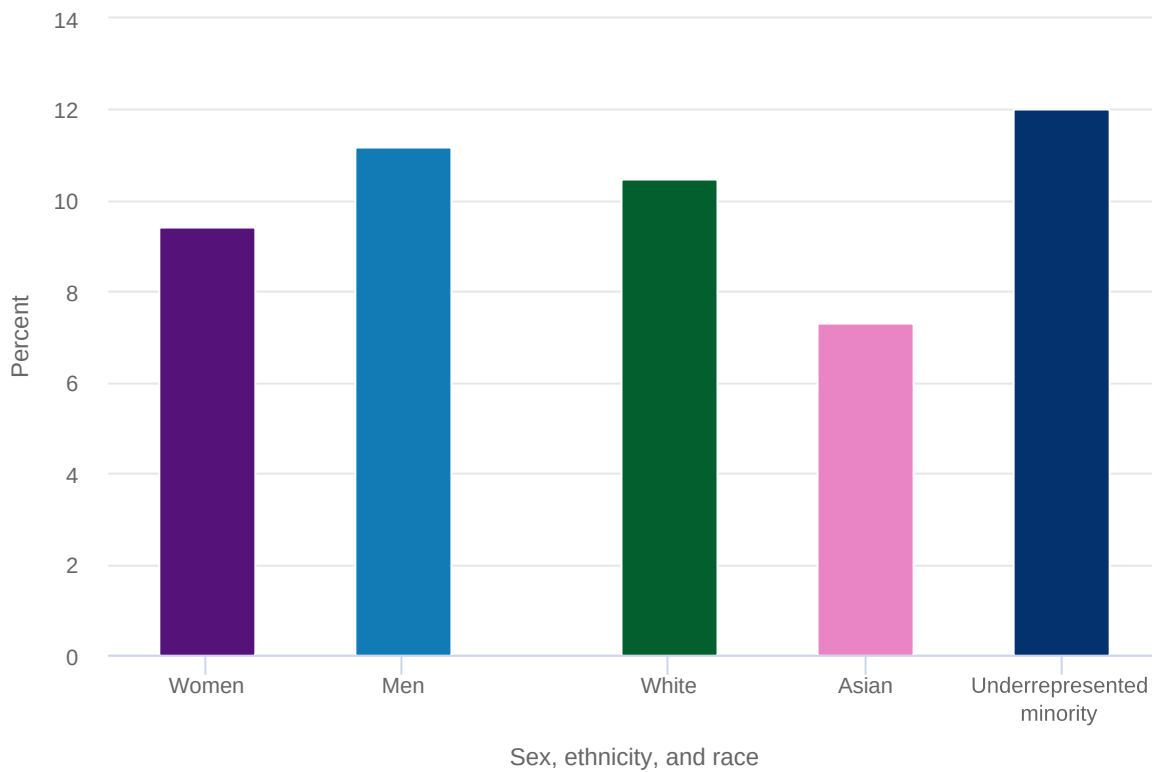

FIGURE 5-E
 Employed scientists and engineers with disability, by sex, ethnicity, and race: 2017

Note(s)

The National Survey of College Graduates asks the degree of difficulty—none, slight, moderate, severe, or unable to do—an individual has in seeing (with glasses), hearing (with hearing aid), walking without assistance, lifting 10 pounds, or concentrating, remembering, or making decisions. Respondents who answered "moderate," "severe," or "unable to do" for any activity were classified as having a disability. Underrepresented minority groups include black or African American, Hispanic or Latino, and American Indian or Alaska Native. Scientists and engineers are individuals under the age of 76 who have a bachelor's or higher degree, are living in the United States, and have a science and engineering (S&E) or S&E-related degree or occupation.
