

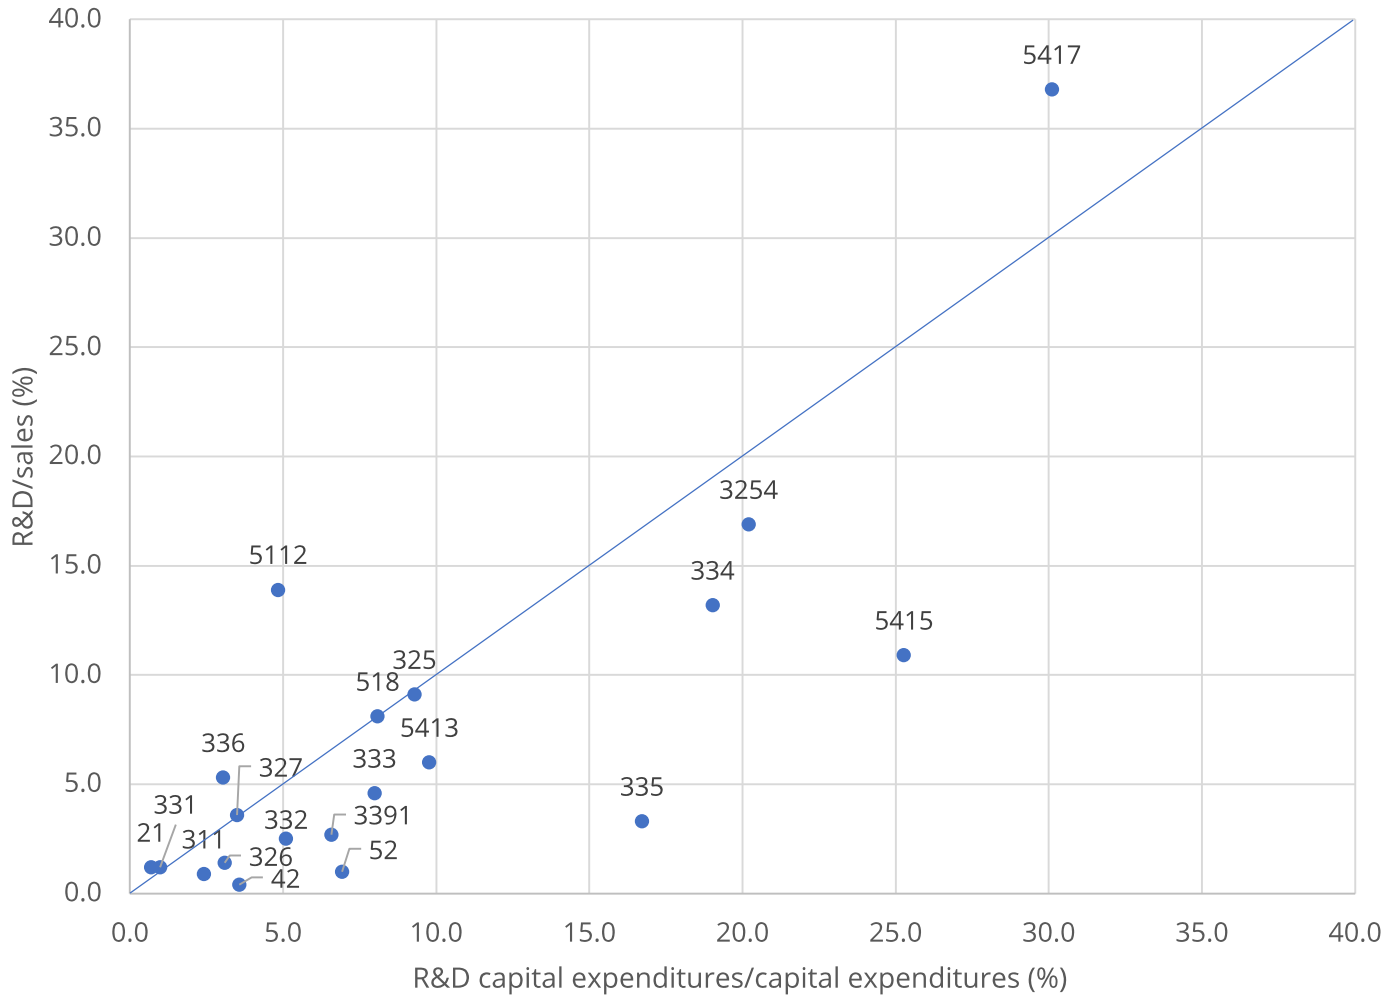

Figure 3

U.S. R&D capital expenditures as share of capital expenditures and R&D-to-sales share, by selected industry: 2020

NAICS = 2017 North American Industry Classification System.

Note(s):

Codes shown in scatter plot refer to NAICS industry classification codes; see table data source. The diagonal is a reference line where the horizontal values (x-axis) are the same as the vertical values (y-axis). Industry classification is based on the dominant business code for domestic R&D performance, where available. For companies that did not report business codes, the classification used for sampling was assigned. Statistics are representative of companies located in the United States that performed or funded \$50,000 or more of R&D and are not comparable with estimates published for years prior to 2018.
