

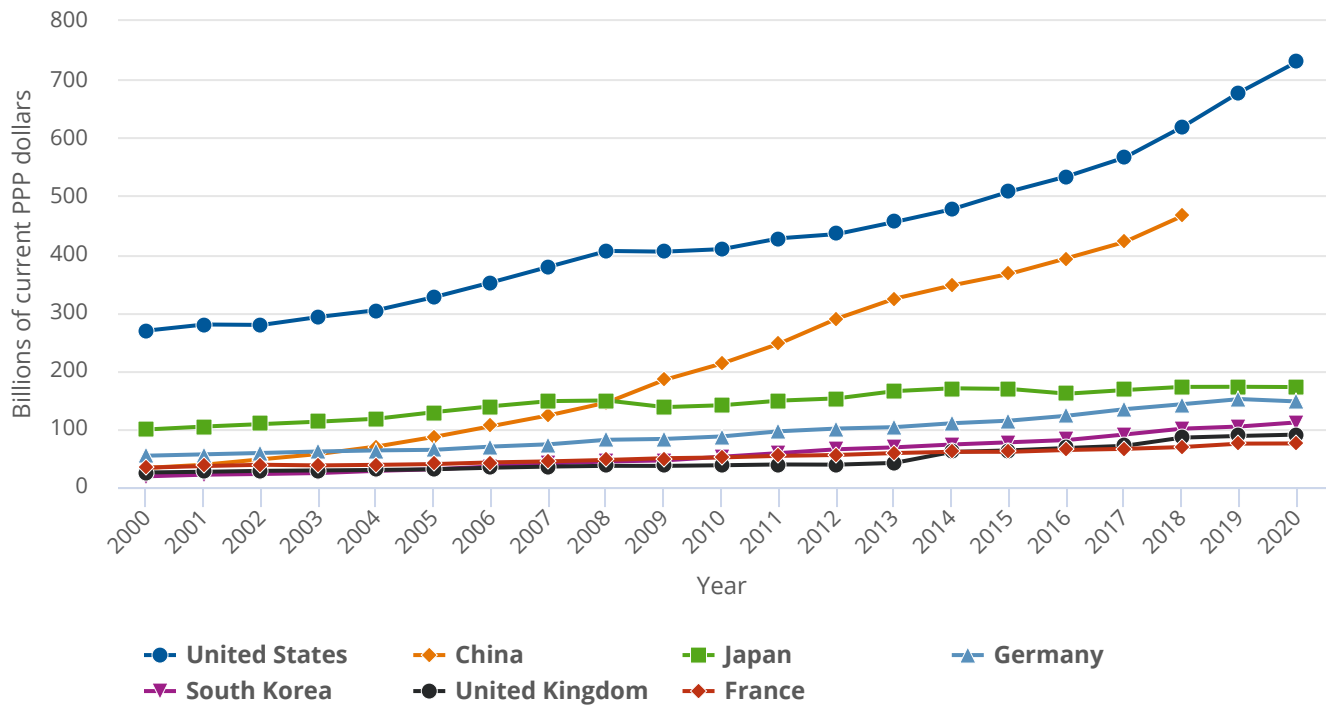

Figure 1**Gross domestic expenditures on R&D, by selected country: 2000–20**

OECD = Organisation for Economic Co-operation and Development; PPP = purchasing power parity.

Note(s):

Data are for the top seven R&D-performing countries with R&D data reported by the OECD. Data are not available for all countries for all years. Historical data have been updated from previous publications to reflect recent suppression of China data dating back to 2019 and revision of United Kingdom data by the OECD. Data for the United Kingdom dating back to 2014 are provisional and may be revised. For more information, please visit source link.
